ABSTRACT

A history of the development of the University of Kentucky Community College System (UKCCS) and selected data on 1990-91 enrollments, instructional programs, financial support, and student characteristics comprise this report. Section I focuses on enrollment, providing fall 1990 headcount data for each of the 15 UKCCS campuses aggregated by full-/part-time status, class, gender, and residence; enrollment data for 1964 and fall 1981-1990; full-time equivalent enrollment (FTE) for 1964 and fall 1981-1990; and headcount enrollment of first-time freshmen from 1980 to 1990. Section II presents or compares headcount enrollment by degree level and course level; declared majors; number of graduates by degree awarded, by technical program, and by year; number and type of library materials; highest degree attained by UKCCS faculty; staff and faculty development activities; number of students served by type of continuing education unit (CEU); number of CEU's awarded by type; and number of individuals served by community service activities. Section III analyzes the financial support base of UKCCS, detailing general fund expenditures by function, and average salaries by rank for teaching faculty. Section IV explores student characteristics, including mean American College Testing Program scores of first-time freshmen by test subject area and by year; estimated family incomes; ethnicity; and distribution of headcount enrollment by age groups. A directory of UKCCS staff and 37 data tables are included. (WJT)

DEVELOPMENT OF THE COMMUNITY COLLEGE SYSTEM

In 1962 the General Assembly of Kentucky, through the leadership of Governor Bert T. Combs, enacted legislation mandating the formation of a system of community colleges and entrusted the Board of Trustees of the University of Kentucky with the operation of such a system. At the same time, the legislature recommended five sites for future colleges.

There were two reasons for giving the operation of the system to the University of Kentucky Board of Trustees. The first was the recognition that as the governing board of the state's land grant university, the University of Kentucky Board of Trustees already had the responsibility for the planning and operation of state-wide programs. The second reason was the recognition of the existence of the five extension centers then being operated by the University of Kentucky. Between 1948 and 1962, the University of Kentucky had opened four extension centers at Covington, Cumberland, Fort Knox and Henderson and assumed the responsibility of the municipally run Ashland Junior College.

In creating a system of community colleges, the 1962 General Assembly abandoned the extension center philosophy of the program then operated by the University of Kentucky and committed the state to a comprehensive community college program. A threefold function of career-oriented technical programs, pre-baccalaureate education and adult-continuing education was called for in the enabling legislation.

In July 1964, the University of Kentucky, guided by the leadership of its sixth president, Dr. John W. Oswald, provided for both the operation of a University System and a Community College System under the Board of Trustees. The Community College System operates as an autonomous system with the determination and administration of its academic programs separate from those of the University System. The chief administrative officer of the Community College System is a Chancellor who is directly responsible to the President of the University.

New community colleges opened at Elizabethtown and Prestonsburg in 1964, bringing the total number of campuses under the new System to seven. Total enrollment that fall was 2,876 students.

The Community College System continued its growth in all respects after 1964. In 1965, new community colleges opened at Hopkinsville and Somerset. After studies in 1965 and 1967 regarding the need for additional community colleges, recommendations concerning criteria to be used in establishing new

community colleges were made to the University of Kentucky Board of Trustees. These criteria were adopted by the Board and submitted to the Council on Higher Education — the state's coordinating and planning body for public institutions of higher education. Acting on the Council's recommendation, the General Assembly amended the Community College Act to recognize the Lexington Technical Institute, which had been operating on the University campus since August 30, 1965; and to authorize new community colleges at Louisville and Maysville in 1966, one at Hazard in 1967, and one at Madisonville in 1968. These latter four units were subsequently established and opened for students in 1968.

In July 1968, Paducah Junior College, a municipally operated college founded in the 1930's, joined the Community College System as Paducah Community College. This brought to fifteen the number of units then operating under the University of Kentucky Board of Trustees. Also in 1968, the General Assembly authorized the establishment of two additional community colleges, at Glasgow and Carrollton; however, funds were never appropriated for their activation.

In January 1970, the General Assembly of Kentucky, recognizing the need for additional higher education opportunities in the Northern Kentucky area, authorized the creation of a four-year college, Northern Kentucky State College. The facilities of the Northern Community College, operated since 1948 by the University of Kentucky, were as of July 1, 1970, transferred to the administrative control of the newly-formed Northern Kentucky State College, now Northern Kentucky University. This reduced to fourteen the number of units operating under the University of Kentucky Community College System.

Effective with the 1972 Fall Semester, the Fort Knox Community College was changed to a four-year residence instruction center which was under the administrative control of the University of Kentucky Subsequently, the four- year residence instruction center designation was dropped. Nearby Elizabethtown Community College now offers courses at Ft. Knox. Also in the Fall of 1972, a sub-unit of Jefferson Community College began operation. The Southwest Campus of Jefferson Community College was opened in response to the request for more educational opportunities made by the citizens of the Southwest section of Jefferson County. The operation was temporarily housed in a high school - primarily operating in the late afternoon and evening hours and serving mainly part-time students. A permanent facility was designed and constructed and the new campus was officially opened during the summer of 1980.

The University of Kentucky Board of Trustees in December, 1983, changed the status of the

Lexington Technical Institute to that of a community college. Effective July 1, 1984, the Institute became Lexington Community College. Transfer programs were added to the offerings which, formerly, had been limited to technical programs.

In the Fall of 1984, a sub-unit of Henderson Community College was opened at Owensboro. The Owensboro campus of Henderson Community College was authorized by the 1984 legislature. Then in 1986, the legislature approved a separate community college for Owensboro. As a result, the Owensboro campus of Henderson Community College became Owensboro Community College effective July 15, 1986. A permanent facility was constructed and the new campus was opened in January, 1989.

At the present, the University of Kentucky Community College System is comprised of 14 community colleges. One of these colleges, Jefferson, has two campuses.

SECTION I

ENROLLMENT

The number of students enrolled in the University of Kentucky Community College System during the 1990 Fall Semester is presented in Tables 1 through 4. An enrollment history is presented in Tables 5 through 7.

The headcount credit enrollment in 1990 was 40,758 students. This enrollment represented a numerical increase of 4,304 students over the 1989 Fall enrollment of 36,454.

Table 1 indicates that of the total 1990 enrollment, 18,096 were full-time (44.4%) and 22,662 were part-time (55.6%). Table 2 shows that 24,406 were freshmen (59.9%), 9,511 (23.3%) were sophomores, and 6,841 (16.8%) were non-degree students. The ratio of freshmen to sophomores remained relatively unchanged from the previous four years and is typical of most community colleges in that the retention rate of sophomores is generally low. Fifty-three percent of the freshmen, 44 percent of the sophomores, and 16 percent of non-degree students were full-time students in 1989.

The number of men and women enrolled is shown in Table 3. Of the students enrolled, 13,770 (33.8%) were men and 26,988 (66.2%) were women. This was about the same percentage of men and women as in 1989. Since 1976, the percentage of women in the System has been higher than the percentage of men. Forty-nine percent of the men in 1990 were enrolled as full-time students, and 42 percent of the women were enrolled on a full-time basis. In 1989, 46 percent of the men and 42 percent of the women were enrolled as full-time students. In general, however, the percentage of full-time student enrollments has declined over the last decade even though the actual number of students has increased.

The number of students enrolled in the Community College System by place of residence is shown in Table 4. In 1990, 908 students were non-residents of Kentucky or foreign. This means that 98 percent of those students receiving credit instruction in the 1990 Fall Semester were Kentucky residents.

Enrollment History

Tables 5 through 7 present a history of enrollment in the University of Kentucky Community College System. Table 5 shows the headcount enrollment in 1964 when the System was established and for the ten year period, 1981-1990. Table 6 provides similar information about the full-time equivalent enrollment. Table 7 indicates the number of first-time freshmen enrollees from 1980 to 1990.

Beginning with 1964, credit enrollment increased from 2,876 students in seven colleges to 17,511 in thirteen institutions in 1977. In thirteen years, this meant a numerical increase of 14,635 students and a percentage increase of 509. Over 85 percent of this growth occurred in the eight colleges started after 1964, and five remaining original colleges accounted for only 29 percent or 5,022 students of the total enrollment as of Fall, 1977. In 1978, however, the enrollment dropped to 15,828 students. This was a decline of 1,683 from 1977 which represented a decrease of almost ten percent. The decline occurred in a number of the colleges but was most evident at Jefferson Community College where there was a decrease of 1,183 students. The decrease in headcount enrollment in 1978 can be partially explained by a drop in the number of high school graduates and by a substantial number of students losing eligibility for Pell Grants due to lack of satisfactory academic progress. The total enrollment in 1979 of 17,135 students was still 376 below the high of 17,511 students reported in 1977. In 1980, however, the enrollment increased to 19,245 students. This was an increase of 2,110 students over 1979, an increase of 12 percent. In 1981, 20,373 students were enrolled, an increase of 1,128 students or a six percent increase over 1980. An all time high for the System was reached in 1982 with 22,116 enrolled, an increase of 1,743 students over 1981 or an increase of eight percent. In 1983, a new record was set with a total of 24,059 students enrolled. This was an increase of 1,943 students over 1982, an increase of nine percent. The increases from 1979 to 1983 were due, in part, to an increasing number of older students. Also, due to the state of the economy, some individuals may have been seeking higher education in lieu of entering directly into the work force. A

slight decrease in headcount enrollment was experienced in 1984 and 1985 which may have resulted from an improved economy as more individuals opted to work rather than pursue additional education. In 1986, however, another enrollment record of 25,569 students was set. New records were established in 1987 when the System enrollment reached a high of 29,780, in 1988 with 33,063 enrolled, in 1989 with 36,454 enrolled, and again in 1990 when the enrollment reached 40,758. From 1985 to 1990 there was a 71 percent increase in enrollment.

Table 6 indicates the full-time equivalent credit enrollment for 1964 and 1981-1990. The full-time equivalent (FTE) computation is based on the total credit hours for which students are enrolled, divided by 16. Prior to 1973, the ratio was 16 to 1 and from 1973 to 1982 the ratio was 15 to 1. The total FTE credit enrollment for Fall 1990 was 22,953, a System record. This was a numerical increase of 2,548 over the Fall 1989 FTE enrollment of 20,405. Beginning with 1964, FTE credit enrollment in the Community College System, calculated on a 15:1 ratio, had increased from 2,084 to 11,732 in 1977 reflecting a growth of 463 percent. A decrease in 1978 represented a decline of nearly 13 percent in FTE enrollment from 1977. An increase in 1979 narrowed that decline to five percent. Another increase in 1981 represented a 13 percent increase over 1977, and a 1982 increase of 843 was an increase of six percent over 1981. Even with the change in ratio to 16 to 1 in 1983, there was an increase of 114 FTE students over 1982. The decline in 1984 of 620 represented a four percent decrease from 1983, and the decline between 1985 and 1984 was less than one percent. Record FTE credit enrollments have subsequently been established in 1986, 1987, 1988, 1989, and 1990.

First-time freshmen enrollment, as seen in Table 7, accounted for 24 percent of the total enrollment and represented 39 percent of the freshmen enrollment of 24,406. Since 1969, the percentage of first-time freshmen in relation to the total enrollment has ranged from a low of 18 percent in 1983 to a high of 44 percent in 1989.

SECTION II

INSTRUCTIONAL PROGRAMS

The University of Kentucky Community College System is committed to the development of a comprehensive educational program with emphasis upon both transfer and career or technical programs. The technical programs which prepare the student for job entry upon graduation are designed to be completed in two years. Information relating to the distribution of enrollment is provided in Tables 8 through 18. The number of graduates in these programs is detailed in Tables 19, 20, and 21. Table 22 provides information pertaining to the library holdings which support the instructional programs. An analysis of the degrees held by the full-time teaching faculty is found in Table 23. Staff and faculty development activities are detailed in Table 24 and continuing education and community service programs and activities are reported in tables 25, 26, and 27.

An analysis of the headcount enrollment by degree program is shown in Tables 8 through 12. As shown in Table 8, 14,297 (35.1%) of the students were in transfer programs which lead to an Associate in Arts or Associate in Science degree while 19,620 (48.1%) were enrolled in technical programs which lead to an Associate in Applied Science degree. The remaining 6,841 (16.8%) were mostly part-time students who had no degree objective. Of the students enrolled in the transfer programs, 8,756 (61.2%) were full-time, while in the technical programs, 8,273 (42.2%) were full-time.

Table 9 provides information on the change in enrollment between 1989 and 1990. There was an increase in transfer enrollment in 1990 at all institutions except Hazard and Jefferson (DT) Community Colleges. Increases in technical degree enrollment were experienced in 1990 at all colleges in the System except Hopkinsville Community College. Non-degree students decreased at all colleges in 1990 except Ashland, Elizabethtown, Jefferson (DT), Lexington and Owensboro Community Colleges. The percent of change in transfer enrollment ranged from an increase of 47.5 percent at Jefferson (SW) to a decrease of 9.0 percent at Hazard. The percent of change in technical enrollment ranged from an increase of 83.4 percent at Southeast, reflecting a change in the method of classifying students, to a decrease of 8.9 percent at Hopkinsville. The percent of change in non-degree enrollment ranged from an increase of 16.5

percent at Elizabethtown to a decrease of 83.5 percent at Southeast, again due to a change in the method of classifying students. Systemwide there was an increase of 13.2 percent in transfer enrollment; 20.2 percent in technical enrollment; and a 8.7 percent decline in non-degree enrollment. The greater percentage of students enrolled in technical programs in 1990, 48.1 percent, compared to 35.1 percent enrolled in transfer programs, continued a trend toward technical programs which began after 1971 when 68 percent of the students were enrolled in the transfer programs.

A comparison of Tables 10 and 11 indicates that, on a percentage basis, more men in comparison to women were enrolled in the transfer programs than in technical programs whereas more women were enrolled in technical programs. Of the 14,297 students pursuing a transfer degree, 5,900 (41.3%) were men and 8,397 (58.7%) were women. Of the 19,620 students in the technical programs, 5,403 (27.5%) were men and 14,217 (72.5%) were women. More women 4,374 (63.9%) than men, 2,467 (36.1%), were enrolled as non-degree students (Table 12).

The credit hour production by degree level is shown in Table 13 and the comparable full-time equivalent enrollment is presented in Table 14. The FTE enrollment is computed by dividing the number of credit hours by 16. Of the 22,954 FTE students, 9,571 (41.7%) were in the transfer programs while 10,388 (45.3%) were in technical programs and 2,995 (13.0%) were non-degree. The difference between the percentage ratios of transfer and technical enrollment by headcount (Table 8) and full-time equivalent (Table 14) is partially explained by the greater number of part-time students in the technical programs.

Tables 15 through 17 provide information on the enrollment by course level as differentiated from student degree level. As seen in Table 16, the full-time equivalent enrollment was 14,704 in transfer level courses and 8,249 in technical level courses. This was due primarily to the fact that approximately one-half of the course work in technical degree programs consists of general education and courses which are reflected in the transfer course enrollment.

Table 18 indicates the declared majors of students by college. The declared majors at a particular college may differ from the programs offered by the college. In such case, students may be planning to transfer to a college offering the degree.

Analyses of graduates of the University of Kentucky Community College System are shown in Tables 19-21. Associate in Arts and Associate in Science degrees are awarded to

students in transfer programs who successfully complete, with at least a "C" average, one of the specified curricula, all of which require at least 60 semester hours. The Associate in Applied Science degree is awarded to students successfully completing technical programs. These programs are intended to lead to immediate employment upon graduation. Table 19 indicates that of the 2,659 students who received an associate degree during the 1989-90 academic year, 1,111 (41.8%) were in the transfer programs while 1,548 (58.2%) were in the technical programs.

The program areas in which the Associate in Applied Science degrees were awarded are shown in Table 20. There were graduates from thirty-three of the technical programs or program specializations offered in the Community College System. Among the Applied Science degrees, 85 (5.5%) were in Accounting Technology, and 241 (15.6%) were in Management Technology, 568 (36.7%) were in Nursing, and 149 (9.6%) were in Office Administration,

A history of the number of degrees awarded in the University of Kentucky Community College System from 1983 through 1990 is presented in Table 21. The Community College System has discontinued the Certificate of College Studies which was last awarded in 1974. Effective with the 1974-75 academic year, the minimum number of credit hours required for the Associate in Arts and Associate in Science degrees was reduced from sixty-four to sixty. The 2,659 degrees awarded during 1990 was a high for the System.

Table 22 presents information relating to the number and type of library materials supporting the instructional programs. Increases in both print and non-print units were reported by the colleges for 1989-90. A number of colleges are developing sizable collections of microform and other non-print units. A library to support the programs of Owensboro Community College, the newest institution in the System, was under development. Students attending Lexington Community College, which is located on the University's Lexington Campus, had access to Lexington Campus libraries. Community College students throughout the Community College System had access to all community college libraries and the University's Lexington Campus libraries through an electronic information network.

An indication of the educational level of the full-time faculty is shown in Table 23. Of the 980 full-time faculty members, the majority, 744 (76%) had a masters degree while131 (13%) had a doctorate and 105 (11%) had a bachelors or less.

As in the past few years, staff and faculty development in the University of Kentucky Community College System in 1990-1991 was supported by systemwide conferences, orientation programs, assistance grants, and by similar in-service programs and grants operating in the individual colleges in the System. In addition, participation by the faculty and staff in external professional associations and meetings was encouraged and financially supported, along with a limited number of sabbaticals and leaves of absence. Thirteen of the colleges also participated in the Teaching Consultation Program (TCP), a consulting service provided to faculty who wish to analyze their teaching and implement changes.

Table 24 shows participation in faculty development activities by college. As shown in Table 24, 355 in-service programs were conducted within the Community College System in 1990-1991 and a total of 77 consultants and faculty participated in TCP. The Community College System Office also granted 30 Summer Teaching Improvement Fellowships, totaling $31,396, to assist faculty in improving and revising course materials and five faculty were awarded sabbatical leaves. Thirty-seven faculty were awarded mini-grants to conduct projects in their classrooms to improve student learning.

In addition to these activities, systemwide workshops and conferences were hosted by the Community College System for TCP teaching consultants, new faculty and staff, division chairmen, social science faculty, allied health faculty, education faculty and science faculty. The Instructional Skills Development Program, was continued with workshops on using videotapes and classroom observation being presented. Forty faculty from twelve colleges also participated in a humanities seminar sponsored by a grant from the National Endowment for the Humanities.

Tables 25, 26 and 27 present information relating to the continuing education and community service activities offered during 1989-90. A total of 30,742 persons were involved in continuing education activities during this period. The community colleges reported that they awarded 30,245 CEU'S to these individuals. In addition, 372,059 participants took part in community service programs offered by the community colleges.

Notes: One Continuing Education Unit (CEU) represents 10 contact hours of participation in an organized continuing education experience of a non-credit nature under responsible sponsorship and qualified instruction. The definitions for the three types of CEUs are as follows:

Area I — CEUs given to individuals for programs which are wholly structured to provide skills and/or knowledge for occupational improvements in various fields.

Area II — CEUs given to individuals for programs specifically organized to provide assistance in the solution of problems confronting society (i.e. health, environment, social change).

Area III — Institutional CEUs (not given to individuals) used for education programs aimed at providing personal enrichment (i.e. leisure activities, cultural enrichment, consumer interests).

SECTION III
FINANCIAL SUPPORT

Nationally, community/junior colleges have five major sources of revenue for operating funds-local tax support, state support, federal funds, student fees, and private gifts and grants. The major sources of revenue for the University of Kentucky Community College System include: state support, student fees, federal grants, and private gifts and grants. Two colleges benefit from local taxes that provide limited support for enrichment programs.

1989-90 Expenditure Data

General fund expenditure data for 1989-90, categorized by college and major function, are included in Table 28. Expenditures (recurring and nonrecurring) for the major functions totaled 57,868,124 for 1989-90. These funds were expended in support of 20,405 student FTE, which represents an average expenditure of 2,836 per full-time student equivalent. Table includes percentage data for 1989-90 expenditures.

It should be noted that several components of general fund expenditures have been omitted from Table because they were budgeted in/expended from System-wide and University-wide accounts. These exceptions include major items outlined below, which could reasonably be included in a determination of average expenditure per student FTE.

1. Lexington Campus Support ($1,545,500)--Allocated expenditures for direct program support provided by organizational units on the Lexington Campus and for general support provided by University of Kentucky administrative offices.

2. Plant Fund Projects ($1,541,900)-Funds committed to major repair and renovation projects throughout the Community College System during fiscal 1989-90.

3. Debt Service Requirements ($5,585,000)--Expenditures associated with revenue bonds used to fund capital construction projects throughout the Community College System.

4. Other System Support ($2,380,500)-Expenditures incurred for administrative activities at the Community College System level: automobile insurance for System vehicles, System-wide committees, various scholarships, student health insurance, and data processing expenditures associated with a centralized student data system.

The inclusion of these support expenditures, amounting to $11,052,900 for 1989-90, increases total expenditures for 1989-90 to $68,921,024, and average expenditure per student FTE to $3,378.

1989-90 Budget Data

Tables and include recurring budget data for 1990-91. For the community colleges as a whole, $66,374,600 was budgeted for major functions including recurring funds budgeted for capital items.

Overall System: Average Faculty Salaries and Total Head Count	38,030	150	30,286	272	25,344	215	23,619	248	28,530	885

Notes:

1. All salary data are mean averages based on 10-month contracts and were based on the number of teaching faculty members excluding counselors and librarians.

2. Information was compiled for the 1990-1991 Integrated Postsecondary Education Data System (IPEDS) "Salaries, Tenure and Fringe Benefits of Full-Time Instructional Faculty".

3. The overall system average salaries are not weighted by college. Each faculty member's salary across all colleges contributed equally to the calculation.

SECTION IV
STUDENT CHARACTERISTICS

An indication of the academic characteristics of first-time freshmen in the University of Kentucky Community College System is represented by the scores on the American College Test. The American College Test or the ACT Career Planning program is required of all entering students who have no previous college work and are enrolled in a degree program. The ACT is used by all the public institutions of higher education in the state as a counseling and placement device. Students who have been out of high school for several years may take the ACT Career Planning Program instead of the American College Test. The ACT Career Planning Program is designed to help students relate their interests and abilities to educational and career planning.

The mean ACT standard scores in English and Mathematics and the composite score for first-time freshmen in the fall of 1990, is shown by college in Table 33. A total of 5,121 students were included in the results. The mean composite ACT score varies from a high of 19.2 at Paducah Community College to a low of 16.6 at Southeast Community College. The mean composite of 18.0 for the System as a whole is generally lower than the mean composite for the state of Kentucky. A comparison of the mean scores for community college students since 1981 can be seen in Table 34. Beginning in 1990, the scores reflect the use of the Enhanced ACT, a revised version of the ACT. An Enhanced ACT composite score of 18 corresponds to a 15 on the ACT.

Information concerning the estimated family income is found in Table 35. Six percent of the students in the System reported less than $6,000 annual family income and seven percent reported an annual income over $60,000. Sixteen percent reported incomes in the $6,000 to $17,999 range. Twenty-two percent of students, reported family incomes below $18,000.

The ethnic background of the students enrolled in the Community College System is found in Table 36. The overwhelming majority of the students were Caucasian (Other) - 37,699 (92.5%) - with the next largest ethnic group being African-American - 2,350 (5.8%). The largest African-American percentage occurred in 1977 when 14 percent of the students were reported as African-American. Approximately seven percent of the population in Kentucky is African-American.

The distribution of headcount students by age groups is shown in Table 37. The 18,093

(44.4%) students 26 years of age or older as a group comprise the largest category of students by age in the Community College System. There are 11,311 (27.8%) students under 20 years of age and 11,354 (27.9%) in the 20-25 year range. This is the twelfth year in succession that the number of students age 26 and older is greater than those under twenty years of age.
